ABOUT ME

Computer Science Student focused on delivering actionable insights through Data Analytics and Business Intelligence. Proficient in Python, SQL, Excel, and Power BI, with a track record of applying Pandas and NumPy to develop machine learning models, including Sentiment Analysis with LSTM and BERT. Proven ability to apply technical expertise to extract insights from datasets, resulting in data-driven business recommendations.

EDUCATION

- B.Tech (CSE), SR University, 2027
- Intermediate (12th), Sri Chaitanya, CBSE, 2023
- Matriculation (10th), Sri Chaitanya, CBSE, 2021

TECHNICAL STRENGTHS

- **Programming Languages:** Python, C
- **Core Concepts:** Applied Data Structures & Algorithms, Technical Problem Solving, OOP, OS, DBMS, CN
- **Web Technologies:** HTML, CSS, JavaScript,Streamlit
- **Database:** MySQL
- **Version Control:** Git, GitHub
- **Data Visualization:** Power BI
- **Platforms & Tools:** VS Code, Google Colab, Jupyter Notebook, Excel

PROJECTS

- **CricketIQ AI Analytics System (Python | Machine Learning | MySQL | Power BI | Streamlit | Scikit-learn) | Github**
  - Developed an end-to-end cricket analytics system using IPL match data with Python, MySQL, and Power BI.
  - Built a Random Forest model to predict players' next-match scores using feature engineering.
  - Created batting, bowling, and team performance dashboards with interactive visualizations.
  - Developed a Streamlit web application for analytics and score prediction.
- **E-Commerce Churn Analysis (Python, Pandas, Matplotlib, Power BI) | Github**
  - Cleaned and transformed a dataset of 3,000–10,000 records, reducing data processing time by 15–20% using Python and Pandas.
  - Conducted cohort analysis, identifying key churn drivers and helping improve customer retention by 15–20%.
  - Developed an interactive Power BI dashboard tracking 8–10 KPIs, leading to a 15–20% increase in visibility into top-performing products.
  - Generated 5+ business recommendations to improve customer retention and revenue growth.
  - Presented recommendations based on analysis of 3,000+ customer records.
- **Sentiment Analysis using Machine Learning, LSTM, and BERT**
  - Preprocessed a dataset of 10,000–25,000 text entries, improving model training efficiency by 15–20%.
  - Developed and compared 4 sentiment classification models (Machine Learning, CNN, LSTM, and BERT), with BERT achieving 90% accuracy.
  - Achieved a 90% accuracy rate with the BERT model, outperforming baseline models by 4–6%.

INTERNSHIP EXPERIENCE

- **AI-ML Virtual Intern | EduSkills | AICTE & Google for Developers July 2024 – September 2024 (10 Weeks)**
  - Completed a 10-week virtual internship focused on Artificial Intelligence and Machine Learning.
  - Applied Python to preprocess datasets and evaluate multiple machine learning models during a 10-week AI-ML virtual internship.
  - Explored 5+ supervised machine learning algorithms and evaluated model performance using standard metrics.

CERTIFICATE

- TCS iON Career Edge – Young Professional (2025)
- CISCO Networking Academy - Computer Network
- Infosys Springboard - Introduction to NLP
- Infosys Springboard - Introduction to Artificial Intelligence
